

AMD Proprietary Linux Release Notes

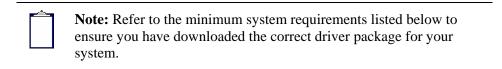

This release note provides information on the latest posting of AMD's Proprietary Linux driver. This particular driver updates the software version to 8.723.

The AMD Linux release notes provide information on the following:

- Web Content
- ATI MobilityTM and Integrated MobilityTM Product Family Support
- ATI Desktop Product Family Support
- ATI Integrated Product Family Support
- AMD FireStreamTM Product Family Support
- ATI Embedded Product Family Support
- Operating Systems Distributions Supported
- System Requirements
- New Features
- Resolved Issues
- Known Issues
- Installing the AMD Proprietary Linux Software Driver
- Driver Update Notification
- Linux Feedback Program

Web Content

The ATI CatalystTM Linux Graphics Driver software suite is available through an installer executable.

ATI Mobility™ and Integrated Mobility™ Product Family Support

The ATI CatalystTM Linux software suite is designed to support the following \mathbf{ATI} MobilityTM products:

AMD Mobility TM Product Family Support	
ATI Mobility Radeon™ HD 4870	ATI Mobility Radeon™ HD 4100
ATI Mobility Radeon TM HD 4860	ATI Mobility Radeon™ HD 3870
ATI Mobility Radeon™ HD 4850	ATI Mobility Radeon™ HD 3850
ATI Mobility Radeon TM HD 4830	ATI Mobility Radeon™ HD 3670
ATI Mobility Radeon TM HD 4670	ATI Mobility Radeon™ HD 3650
ATI Mobility Radeon TM HD 4650	ATI Mobility Radeon™ HD 3430
ATI Mobility Radeon TM HD 4500	ATI Mobility Radeon™ HD 3400
ATI Mobility Radeon TM HD 4300	ATI Mobility Radeon™ HD 2600
ATI Mobility Radeon TM HD 4200	ATI Mobility Radeon TM HD 2400

ATI Desktop Product Family Support

The ATI Catalyst $^{\text{TM}}$ Linux software suite is designed to support the following **ATI** desktop products:

AMD Desktop Product Family Support	
ATI Radeon™ HD 5900 Series	ATI Radeon™ HD 4670 Series
ATI Radeon TM HD 5800 Series	ATI Radeon™ HD 4650 Series
ATI Radeon TM HD 5700 Series	ATI Radeon™ HD 4600 Series
ATI Radeon TM HD 5600 Series	ATI Radeon™ HD 4550 Series
ATI Radeon TM HD 5500 Series	ATI Radeon™ HD 4350 Series
ATI Radeon TM HD 5400 Series	ATI Radeon™ HD 3800 Series
ATI Radeon TM HD 4890 Series	ATI Radeon™ HD 3600 Series
ATI Radeon TM HD 4870 X2 Series	ATI Radeon™ HD 3400 Series
ATI Radeon TM HD 4850 X2 Series	ATI Radeon™ HD 2900 Series
ATI Radeon TM HD 4800 Series	ATI Radeon TM HD 2600 Series
ATI Radeon™ HD 4700 Series	ATI Radeon™ HD 2400 Series

Note: The ATI Radeon™ HD 3870 X2 series of product is currently
not supported by the ATI Catalyst™ Linux software suite.

Note: All-in-Wonder TM variants based on the above are also supported. However, video capture is not supported.
Note: Software driver support for ATI FireGL TM , Integrated, Mobility TM and Desktop products prior to the ATI Radeon TM 9500 is available from <i>www.amd.com</i> .
Note: Specific Workstation products are enabled but not supported in the ATI Catalyst TM Linux Graphics Driver software suite. Official Workstation drivers can be downloaded from <i>www.amd.com</i> .

ATI Integrated Product Family Support

The ATI CatalystTM Linux software suite is designed to support the following **ATI** desktop products:

AMD Chipset Product Support	
ATI Radeon™ HD 4290	ATI Radeon™ 3200 Series
ATI Radeon™ HD 4250	ATI Radeon TM 3100 Series
ATI Radeon TM HD 4200 Series	ATI Radeon TM 3000 Series
ATI Radeon™ HD 3300 Series	

AMD FireStream™ Product Family Support

The ATI CatalystTM Linux software suite is designed to support the following **AMD** products:

AMD FireStream™ Product Support	
AMD FireStream TM 9270	AMD FireStream TM 9170
AMD FireStream TM 9250	

ATI Embedded Product Family Support

The ATI CatalystTM Linux software suite is designed to support the following **ATI** Embedded products:

AMD Embedded Family Product Support	
ATI Radeon™ E2400	ATI Radeon™ E4690

Operating Systems Distributions Supported

The latest version of the ATI CatalystTM Linux software suite is designed to support the following Linux distributions:

- Red Hat Enterprise Linux suite
- Novell/SuSE product suite
- Ubuntu

Note: The ATI Catalyst TM Linux software suite may install on a number of other Linux distributions. Refer to the Package Generation installation instructions for more information.
Note: AMD has contributed packaging scripts to allow creation of other packages, but does not necessarily test, verify or warrant the reliability. Currently Red Hat Enterprise Linux suite and Novell/SuSE product suite are supported Linux distributions.

System Requirements

Before attempting to install the ATI CatalystTM Linux software suite, the following software must be installed:

- XOrg 6.8, 6.9, 7.0, 7.1, 7.2, 7.3, 7.4 or 7.5
- Linux kernel 2.6 or above
- glibc version 2.2 or 2.3
- POSIX Shared Memory (/dev/shm) support is required for 3D applications

The ATI CatalystTM Linux software suite no longer provides precompiled Kernel Modules; all installations require GCC compiler and kernel-headers or kernel-source in order to enable 2D and 3D acceleration.

For best performance and ease of use, ATI recommends the following:

- Kernel module build environment
 - o Kernel source code include either the Kernel Source or Kernel Headers packages
- The RPM utility should be installed and configured correctly on your system, if you intend to install via RPM packages

The following packages must be installed in order for the ATI Catalyst™ Linux driver to install and work properly:

- XFree86-Mesa-libGL
- libstdc++
- libgcc
- XFree86-libs
- fontconfig

- freetype
- zlih
- gcc

New Features

This section provides information on new features found in this release of the ATI RadeonTM Display Driver. These include the following:

• Support for New Linux Operating Systems

Support for New Linux Operating Systems

This release of ATI CatalystTM Linux introduces support for the following new operating system:

• Ubuntu 10.04 early look support

Resolved Issues

The following section provides a brief description of resolved issues with the latest version of the ATI CatalystTM Linux software suite. These include:

- Changes to the color gamma value are now retained in Catalyst Control Center and reflected on the display after X-server restart
- System will now resume properly after hibernation/suspend mode
- Flickering corruption no longer observed while running OpenGL applications with CrossFireTM enabled
- [RHEL4u8] DisplayPort display will now light up after being hotplugged
- [SUSE 11.1] Enabling more than 4 single independent desktops no longer causes black screen hang on starting X

Known Issues

The following section provides a brief description of known issues associated with the latest version of ATI CatalystTM Linux software suite. These issues include:

- Enabling Hybrid CrossfireTM may result in error in dmesg after starting X
- Screen may go blank if the other monitor is unplugged in dual-head mode
- "X.org -probeonly" may cause screen corruption or the system to fail to respond
- [Catalyst Control Center] Some systems may intermittently stop responding when changing scaling options
- System may fail to display error message when improper values are used in "aticonfig --tv-geometry" resulting in invalid "TVHSizeAdj" and "TVVSizeAdj" values in xorg.conf file
- Segmentation fault may occur when running "Quake 4" and "Enemy Territory: Quake Wars" at 1280x1024 or resolutions higher than current desktop resolution
- Resuming from sleep may cause the display number overlay to become corrupted

- RHEL: "Size and Position" adjustments might not be retained after X restart or after system resumes from sleep
- 1080i30 and 1080i25 HDTV modes may fail to apply for HDMI/DVI/DP displays

Note: On Novell's openSUSE, SLED and SLES operating systems running "sax2" or "sax2 -r" on the console overwrites the X.Org configuration file xorg.conf, reverting changes made by running "aticonfig --initial". As a result subsequent X session may start up using the open source ATI RadeonTM on X-Vesa graphics drivers instead of the proprietary ATI Linux Graphics Driver.

Solution: Do not use Sax2 when the proprietary Linux Graphics Driver is installed. Instead configure all display parameters using the ATI CatalystTM Control Center--Linux Edition or the aticonfig command line interface.

Installing the AMD Proprietary Linux Software Driver

Installation information and instructions can found on the AMD website:

- Go to http://support.amd.com/us/gpudownload/Pages/index.aspx
- Select "Linux x86" or "Linux x86 64"
- Select your product family and product
- Click on the GO! button
- From the ATI CatalystTM Display Driver page, click on the "Installer Instructions" link to download the PDF document

Driver Update Notification

To receive driver notifications, add the following RSS feed to your RSS reader: http://www2.ati.com/rss/catalyst.rss

Note: In order to receive notifications you will need to have an RSS reader installed.

Linux Feedback Program

The ATI CatalystTM Linux software suite releases may incorporate suggestions received through the Linux feedback program.

Please refer to http://www.amd.com/us/LinuxCrewSurvey to provide us with feedback.
