

The logo features a dark, circular emblem with a crown-like top. Inside the circle, the text "RADEON PRO" is written in a small, white, sans-serif font, and "Software" is written in a larger, white, sans-serif font below it. The background of the top section of the page is a dark blue, abstract, leaf-like pattern.

OVERVIEW

Radeon™ ProRender is a free un-biased rendering plug-in for your visualization needs in Autodesk® Maya®. Using physically accurate path-tracing technology, Radeon ProRender can produce stunning photorealistic images of your scene and provides real-time interactive rendering and continuous effects adjustments to help create the perfect rendered image. The Radeon ProRender plug-in is fully integrated into Maya – it supports the Maya lights, materials, and textures and renders your geometry accurately. Radeon ProRender also comes with a library of materials to get you started.

Supported Platforms

Radeon ProRender for Maya on MacOS runs on both GPUs and CPUS. OpenCL™ 1.2 is required for GPUs.

Software

- Autodesk® Maya® 2016 with Service Pack 2
- Autodesk® Maya® 2016.5
- Autodesk® Maya® 2017
- Autodesk® Maya® 2018

Operating System

- MacOS X 10.13.3

Beta Testing

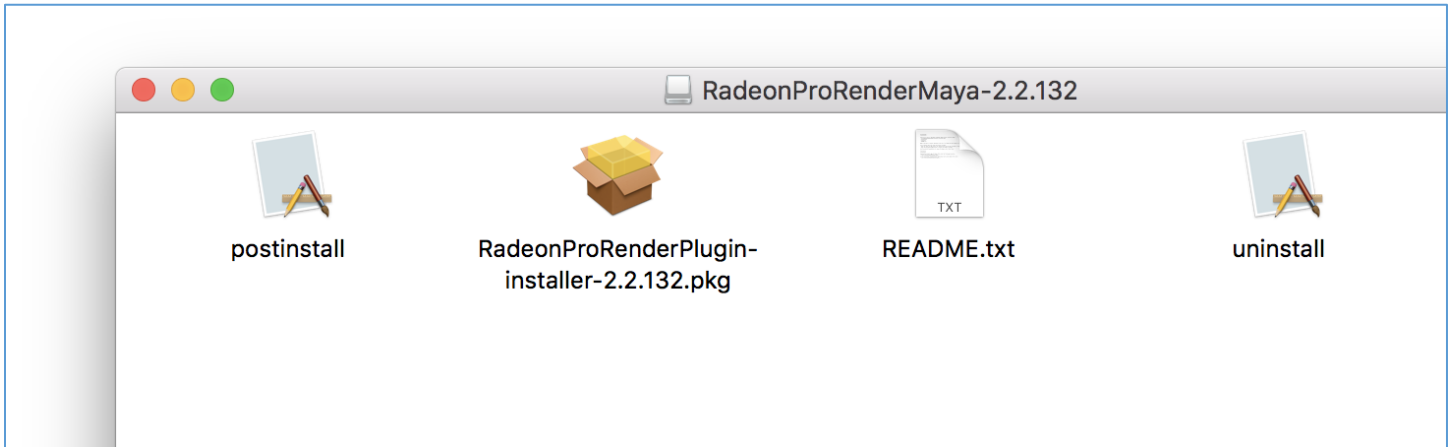

Provide beta feedback [here](#). See the user guide for Radeon ProRender for Maya [here](#).

Known Issues

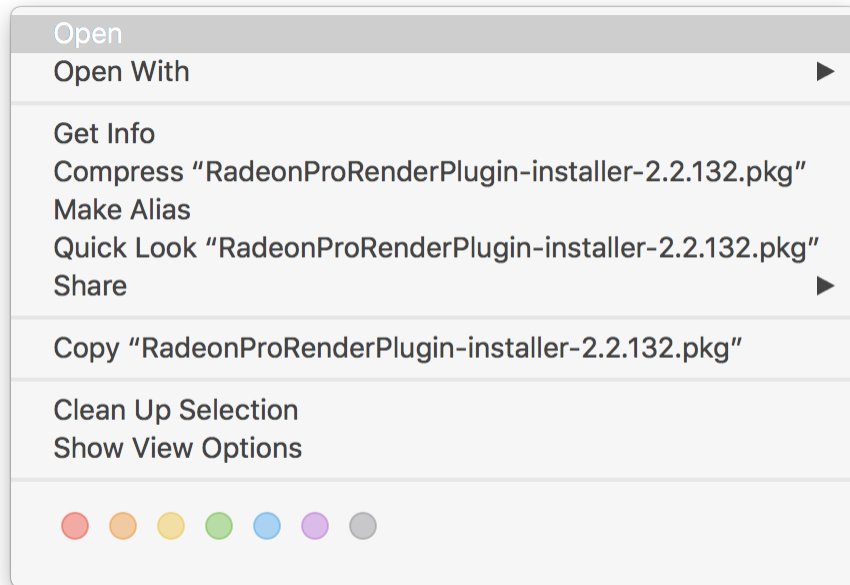

- CPU + GPU is disabled.
- GPU rendering is not supported on Intel integrated graphics.
- Denoising is currently disabled.

Install Radeon ProRender plug-in

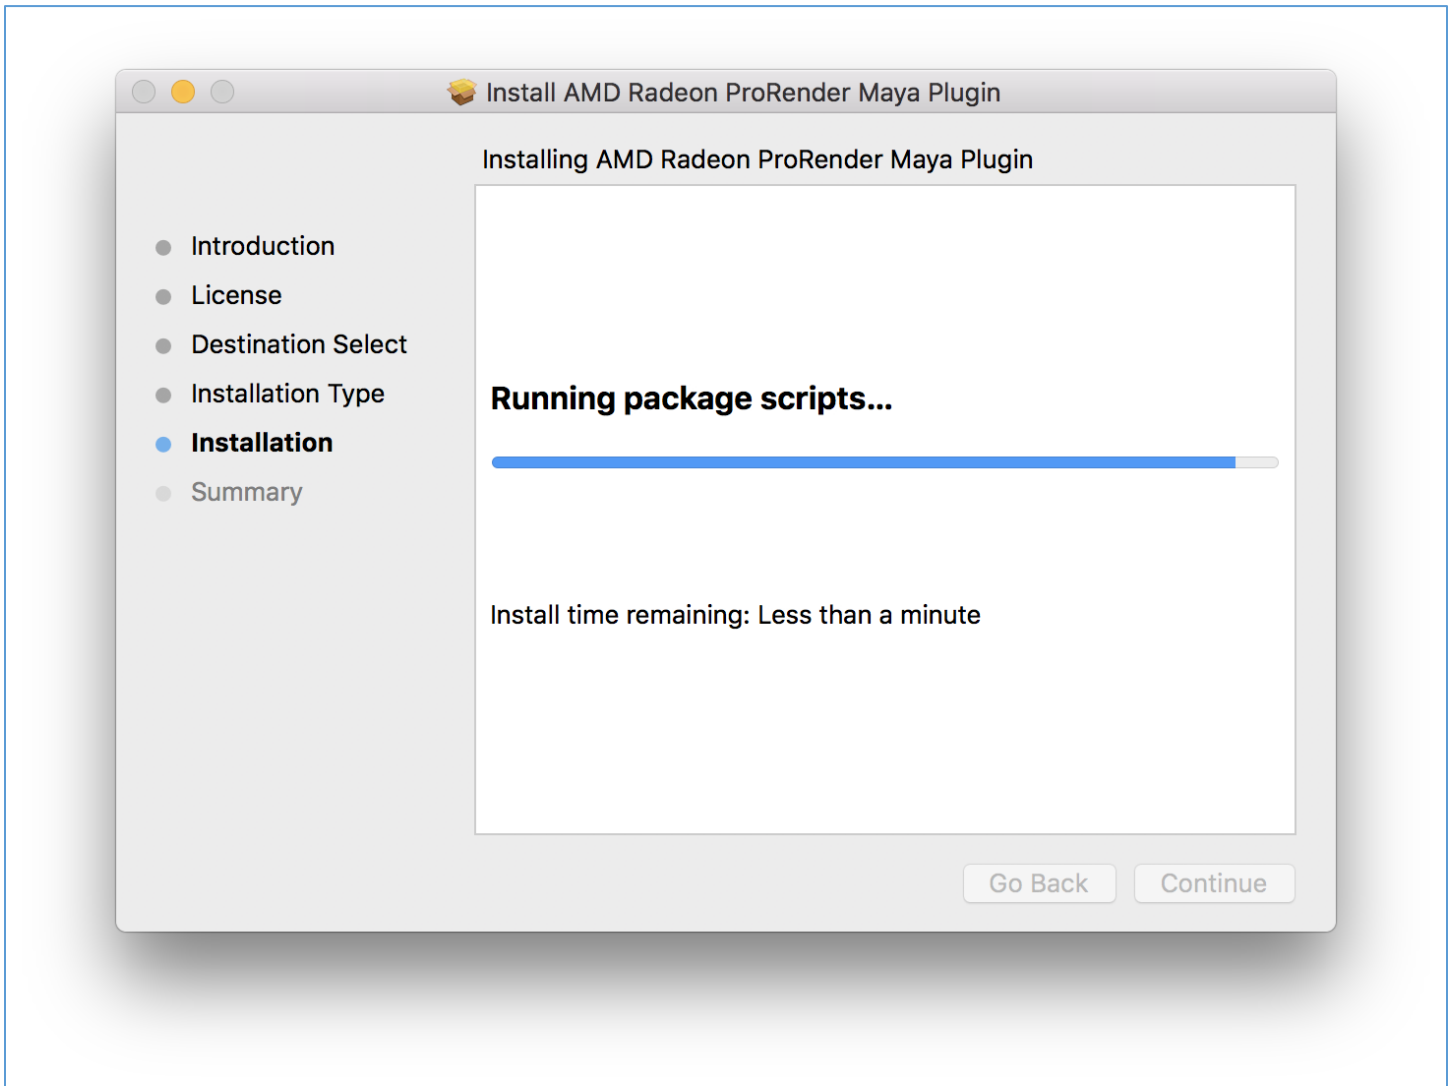

Open DMG.

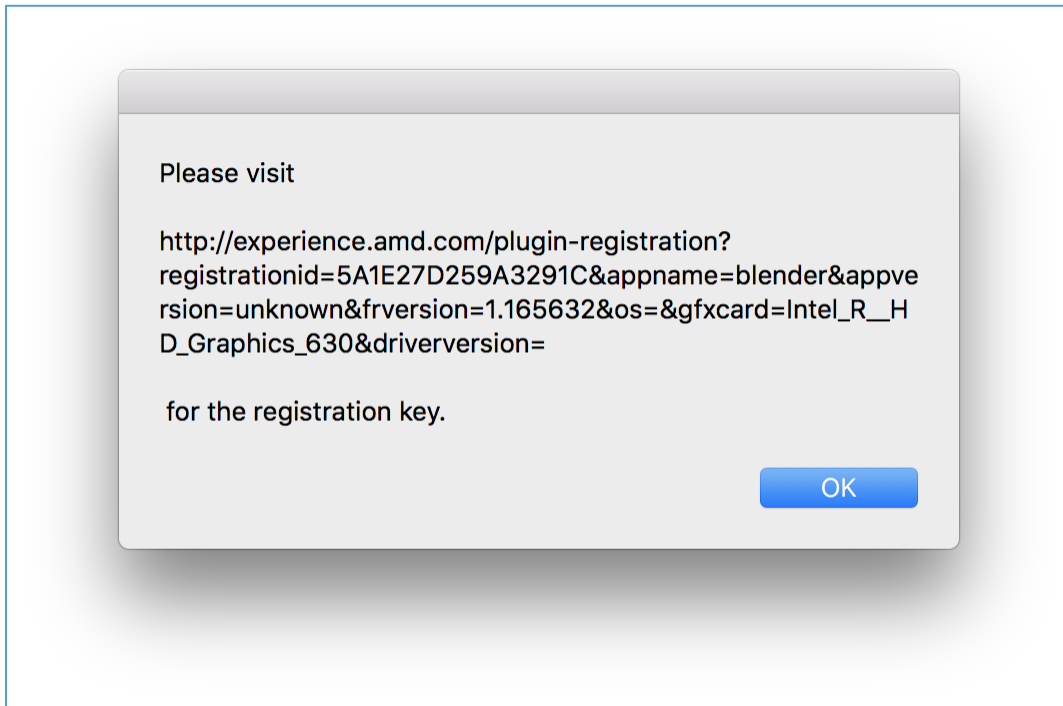

Right-click on installer and choose open - if you just click the file now, you will get an error about "unknown developer." For the final release, you will be able to click on the file directly.

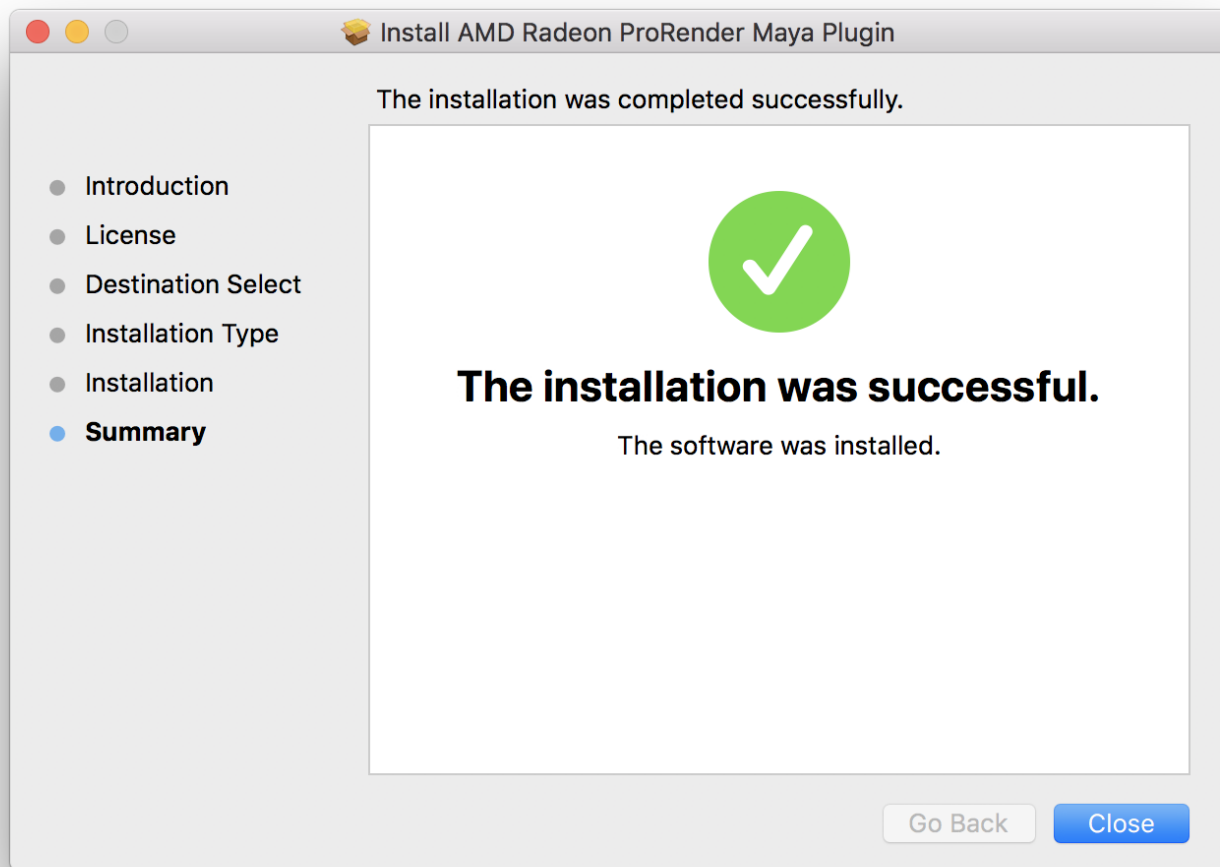

Go through the installation process.

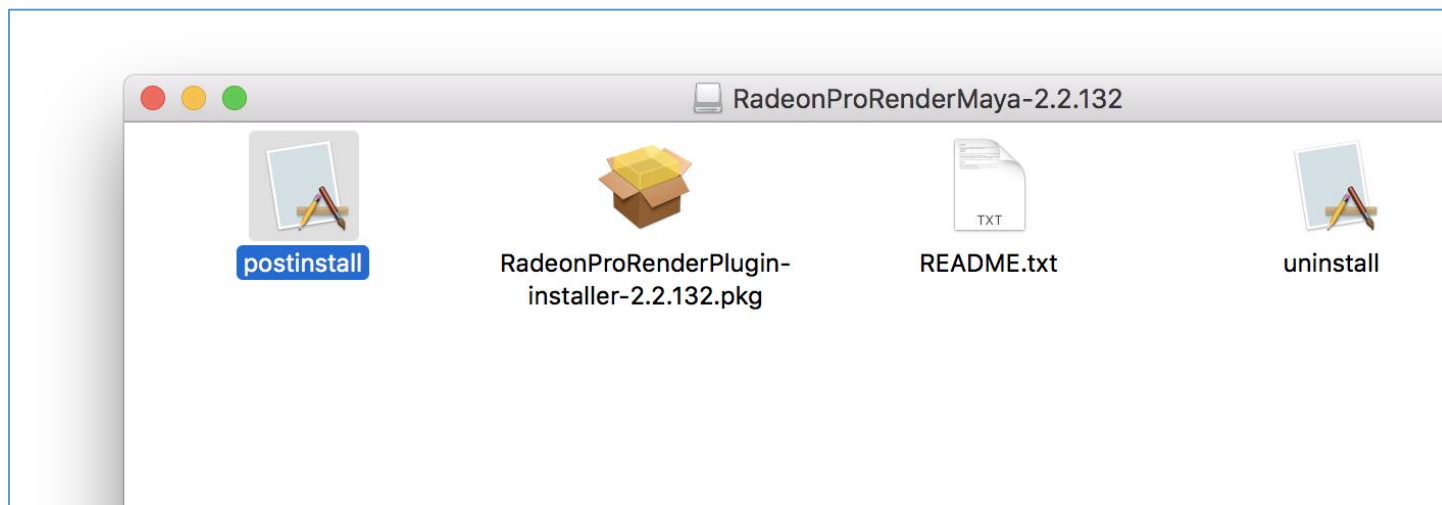

It will prompt for registration. To obtain the registration code, copy this link to a browser. You will be emailed a code. Enter it.

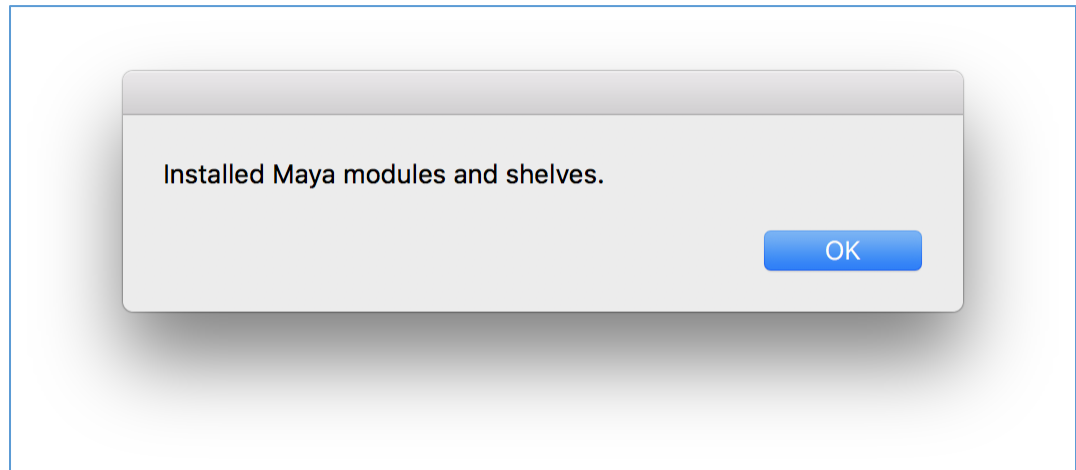

Confirmation that installation was successful.

Run the **postinstall** file.

Confirmation plug-in is installed.
